

About me

Yann Esposito

If you are still waiting a reply from me. Don't take it personally. After reading Digital Minimalism¹ I decided to drastically protect myself against most real-time notifications.

I try to look at my email everyday. But it is not unusual I can skip a few days without checking any notification.

So I'll answer, it can just take a lot of time.

My preferred way to be contacted is via encrypted email. This will certainly be the best way for me to notice you among notifications.

Who am I?

My Internet presence is mostly known from older blog post. In particular:

- Learn Vim Progressively
- Learn Haskell Fast and Hard
- Haskell Web Programming
- Category Theory Presentation

Work

I'm a functional programmer, working remotely for Cisco. I work in Clojure and use Haskell/Purescript during the weekends.

I am part of a full remote team. I work on the backend and I'm particularly specialized in Authentication. I wrote a full OAuth2 and OpenID Connect Provider in Clojure. Right now there is no plan to make it opensource.

Here is are my resumes in PDF format:

- resume
- detailed resume

Tooling

In our programmer community, tooling is essential.

- macOS
 - nix with home-manager
 - yadm for things home-manager had difficult to handle
- emacs (former vim user)
 - doom-emacs (used spacemacs before)
 - org-mode / org-journal / org-roam
 - magit / forge / github-review
- weechat
 - wee-slack

Internet consumption

News

- lobsters
- HN
- laarc
- discoverdev
- /r/haskell
- /r/clojure

RSS

I mostly consume them via elfeed in emacs:
